I am a self-taught fullstack developer willing to start a new stage of personal and professional growth.

Experience

i've been working as Full Stack Frontend Developer in QUIKPAGO, startup based on Maracaibo Venezuela backed by the Y Combinator for 8 months now. my main task while working was implementing several solutions in the front and back.

in the past I have worked for several companies making informative websites and ecommerce stores with Wordpress and Woocommerce.

- Azumarinc
- Dmarka
- Hobby House
- Insupla

I am currently developing some personal projects, which are published in my Github profile.
